Introduction

Where Acoustics Meet Aesthetics

With DWC Acoustics, Dutch Walltextile Company sets a new standard in acoustic wall solutions. These panels combine functionality with refined design: made from high-quality acoustic felt and finished with a luxurious textile top layer. From natural linen fabrics to vegan leather and soft-touch materials — each surface exudes comfort and sophistication.

ACOUSTIC PANEL LIMBOURG (00) AP03

Acoustic Panel Composition

The panels are precision-cut with decorative patterns and in come in a standard size of 60 x 278 cm.

Built from three core components – **A. Felt panel**, **B. Fabric** and **C. Pattern**. – each panel delivers structure, texture and visual depth. There are 12 standard options to choose from: 3 Felt Panels – 3 Fabrics – 3 colours per fabric – 3 Patterns.

You are free to intermix them to customise the final design, which means you can choose from 81 designs in total.

A Felt Panel

Acoustic wall panels are designed to enhance a room's sound quality by absorbing sound waves and minimising echo.

They are ideal for offices, meeting rooms, concert halls, cinemas, public buildings, and are becoming increasingly popular in residential settings.

Felt panels, in particular, are an eco-friendly option—often made from recycled materials. They provide excellent sound absorption and are highly versatile in shape and design due to the material's flexibility. While felt panels may not offer the same luxurious appearance as wooden alternatives, they are available in three standard colours and can be customised to match any desired colour through bespoke options.

B Fabric

LIMBOURG

Wallcoverings in sand and pearly white Belgian linen blends, coarsely or finely woven, create timeless, natural elegance.

LEATHER

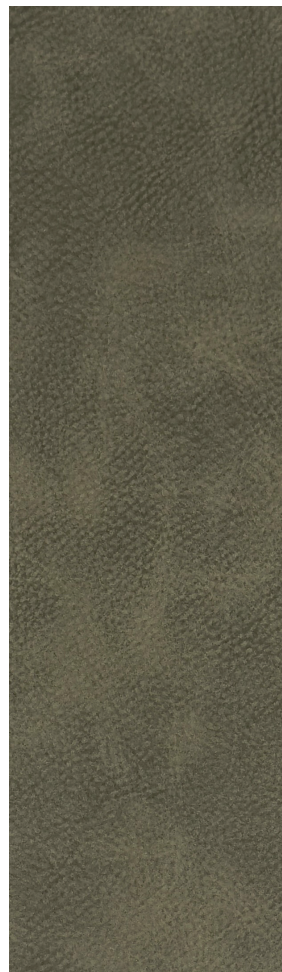

Matte artificial leather wallcoverings in Dark Green, Camel, and Black offer a sophisticated, luxurious texture.

WOMBAT

A soft matte velvet ranging from Sand to a dark Chocolate brown. Tactile and rich, this fabric adds an understated luxurious elegance.

C Pattern

ACOUSTIC PATTERN 01 - ECHO LINES

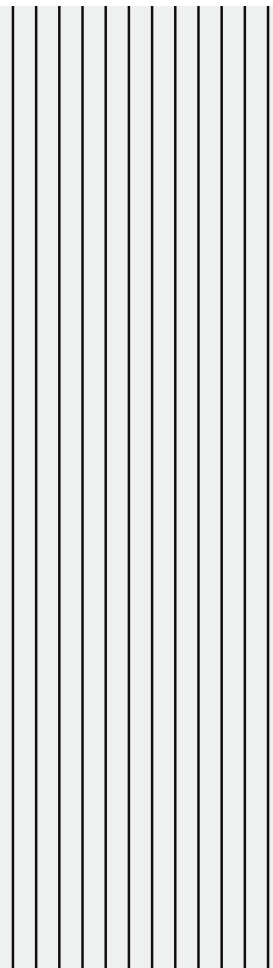

Introducing our elegant acoustic pattern of straight lines, designed to enhance any space with nice combinations of premium felt and fabric. Simple yet sophisticated, it elevates both aesthetics and acoustics.

ACOUSTIC PATTERN 02 - TIDAL FLOW

Our captivating acoustic pattern of all curvy lines is designed to bring a sense of fluidity and movement, this pattern is available in nine combinations of premium felt and fabric, enhancing both the visual appeal and acoustic performance of any space.

ACOUSTIC PATTERN 03 - HARMONIC GRID

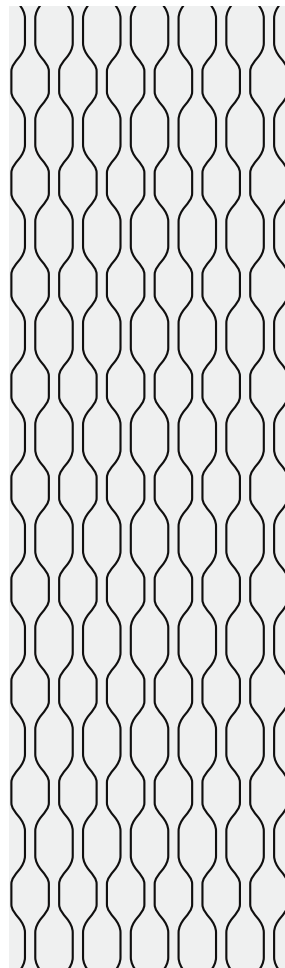

Our dynamic ripple pattern, crafted with interwoven curves evokes rhythm and balance. This design adds sophistication and subtle movement, perfect for transforming any space with a touch of contemporary elegance.

ACOUSTIC PATTERN 01

ACOUSTIC PATTERN 02

ACOUSTIC PATTERN 03

© Pattern: Acoustic Pattern 03

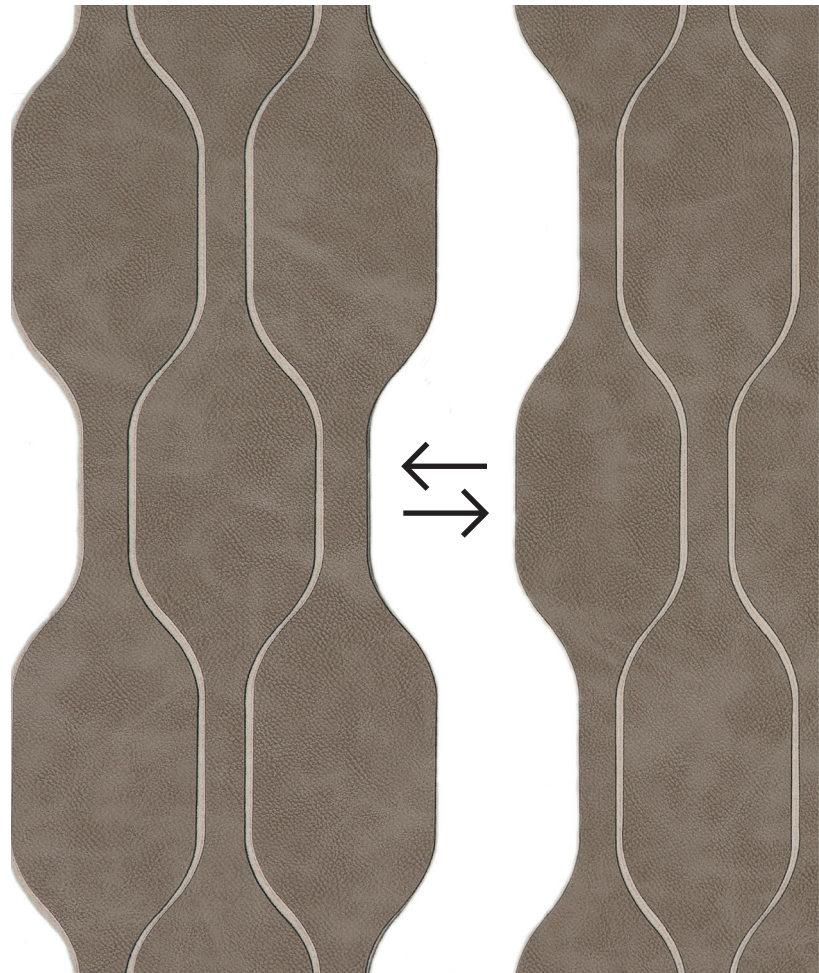

One of our signature designs, **Acoustic Pattern 03**, is specially engineered to allow seamless integration between panels. Each panel is precisely cut so that the pattern interlocks like a puzzle, ensuring a continuous and harmonious design across your wall or ceiling.

See the example image for a demonstration of this unique interlocking capability.

Bespoke solutions are also available. Are you looking for a different fabric? Or a different colour felt? DWC can always source alternative fabrics for your project, and a wide range of colours of felt panels are available. A custom pattern is also an option. DWC Acoustics can deliver you a complete bespoke acoustic solution that will fit any interior.

Designed for residential, hospitality and commercial spaces. DWC Acoustics panels are officially tested and certified for acoustic performance. With extensive personalisation on style.

—

For this project, we developed two bespoke velvet colours tailored to the client's vision. The deep green velvet was used to upholster the sofas, while a vibrant orange version brought the bar chairs to life.

The walls feature custom-designed acoustic panels, crafted not only for functionality but also as a visual statement. Each panel is topped with the same custom-coloured velvet, backed with orange felt panels, and cut into a unique pattern created specifically for this interior.
